

FILE: SHMD REPORT EAGLE PROJECT

Monday, September 1, 2025

Eagle Scout Candidate, Remi Wozniak, and his mother, Rebecca, and 2 Scouts prepping the bed for prior to Saturday planting.

Saturday, September 6, 2025

Eagle Scout Candidate, Remi Wozniak, and Vickie Garcia, CoCal Landscape Consultant, prior to planting trees and plants. Remi showed great management skills and energy in planning and executing this project. Vickie gave unselfishly of her time and expertise before and during the project, educating Remi and his fellow Scouts about pollinating plants and the Serviceberry trees' edible fruit.

Remi showing Scout team the printed plan where the pollinator plants and trees will be placed in each plot

Working compost and biochar into the soil before placing plants. Biochar is added to both hold water and act as a haven for soil microbes.

Placing the Serviceberry tree according to the plan. Funding for this project was initiated by Tom Mehl, former chairman of the Smoky Hill Metro Board. Nick's Garden Center supplied the 2 trees and variety of various pollinator plants at a substantial discount to the District. Colette Haskell and Kurt Schultz from Nick's helped Remi in picking the plants and tree according to Vickie Garcia's well-designed color schematic. Vickie showed Remi how to properly plant the tree.

Remi adding soil microbes to the soil surrounding the tree roots. These microbes help feed the tree and reduce stress.

Complete planting on the west side plot prior to adding mulch. We appreciate one of the park's residents, Mark Bishop, supplying water to the Scouts from his house, to help water the plants and trees.

Complete planting on the east side plot after adding mulch

September 9, 2025 Installation of drip lines in plot by CoCal.
